

With outstanding connectivity and rapid test time, PMB moisture analysers offer the top value in their class. An automatic test-setting function enables easy recall for frequent testing of the same material without additional user programming. USB and RS-232 interfaces let you connect the PMB to a computer or printer. Store results and test programs for future reference with a USB memory stick or PMB's built-in memories. Three heating options offer the flexibility to customise test methods and temperatures. PMB helps free up time for busy lab professionals by allowing them to quickly perform moisture analysis and share test results easily with colleagues.

Superior connectivity in a moisture analyser, with two USB ports for data collection and computer or printer communications
